

ANTHONY LOG HOMES FREQUENTLY ASKED QUESTIONS

Who is Anthony Log Homes?

Anthony Log Homes is a part of Anthony Forest Products Company of El Dorado, Arkansas. Incorporated in 1965, Anthony Forest Products has a long history of manufacturing lumber and laminated products.

What kind of wood does Anthony Log Homes provide?

We use Southern Yellow Pine, the strongest of the softwoods. Southern Yellow Pine is a renewable resource widely used in the construction industry.

What is included in the package?

We only provide the lumber products we manufacture (ie. Logs, log siding, interior paneling, 2" x 8" decking, glulam beams for ridge beams, rafters, posts, girders, and joists).

What is a PowerLog*?

Engineered laminated beams that are milled into various log shapes.

What is a PowerBeam*?

Powerbeams are glued laminated beams offered in industrial and architectural grades used for structural items such as rafters, joists, girders, posts, ect.

What advantages do PowerLogs* give verses other logs?

PowerLogs drastically reduce shrinkage, twisting, warping, and checking which allows for easier construction and less short and long-term maintenance. (PowerLogs* and PowerBeams* are a registered trademark).

Does Anthony Log Homes have builders?

Anthony Log Homes does not have in-house builders. However, we do refer builders who have built our homes before. We also offer a construction video, construction manual, and detailed blueprints to assist you in construction.

How do we connect the logs?

The suggest method of connecting PowerLogs* is with 10" or 14" lag screws depending on the size of the log a you choose.

Are the logs treated?

No. Our logs will be shipped to you in their natural state. You will need to apply a sealant and/or stain to maintain the integrity and appearance of the log.

What is the "R-value"?

The "R Value" of Southern Yellow Pine is approximately 1.5R per inch of wood. The "R Value" of the log walls is low, but the "thermal mass" is high. Airtight log homes with quality windows and doors are very energy efficient.

How long is production time?

Depending on the time of year and demand, production time can be from four (4) to six (6) weeks.

Warranty?

Yes. Our Power Products come with our limited-lifetime warranty and are guaranteed to be free from defects in design, materials, and workmanship and are guaranteed against delamination.

Where are the materials manufactured?

The materials used in our log home package are manufactured at our plant in El Dorado, Arkansas.

Are the logs precut?

Our logs are usually manufactured in 16-foot lengths, which are easier to maneuver. Corners can be pre-notched for your convenience and have a precise fit.

How are the Power Products shipped?

The Power products are shipped to your location on a 48-foot flatebed truck. They are bundled and wrapped with moisture resistant packaging for extra protection during shipping. It is the customer's responsibility to provide a forklift or crane for unloading.

Can a standard plan be customized?

Our standard plans come free with the purchase of your home and can be customized for a nominal fee.

Are windows and doors included?

No. There are hundreds of brands on the market and many are readily available in your local market. By outsourcing and bidding out the items that Anthony does not provide, this can be a cost savings to you.
