

BEAM CUTTER

Prazi Beam Cutter

Convert your circular saw into a beam cutter. It will cut angles up to 45°, vertical blade allows smooth, exact, square cuts, footplate and built-in site ensures gliding manageability while cutting perfectly straight lines. No unattractive over-cut notches, one-pass cut for beams, posts and logs creating errorless match-ups. With 12" cutting capacity, the Prazi Beam Cutter will professionally execute the following cuts; rafter pitch, mitres, stair arches, log cuts, compound angles, bandsaw cut, notched 6 x 12, panels and ripping and many more. The beam cutter will cut 12" square cuts which no circular saw can, will cut multiple stair jacks in one operation it does what a chain saw or circular saw can not, splices with square cuts, cut arches, compound angles, mitres, rafters, will even cut clean through railroad ties.

PR-7000 fits all manufactures 7 ¼ & 8 ¼ worm drive
PR-2000 converts the following top handle 7 ¼ circular saws into precise tools that have the cutting capacity of chain saw
