

DRILL PRESS

Shop Fox Radial Drill Press

The radial drill press is one of the most versatile and handy drill presses you can add to your shop. Between the tilt of the head and the tilt of the table, you can drill any angle necessary. You can also use it as a horizontal boring machine. Add to this an incredible swing which allows you to bore to the center of a work piece that is 34" wide and you have one of the best values available in a drill press.

W1670 Shop Fox Floor Model Radial Drill Press

Shop Fox 17" Floor Model Drill Press

This solid performing drill press is perfect for the average size cabinet shop or small machine shop. With the extra horsepower aluminum finned motor, the morse taper #3 spindle for the large direct mount bits and the closely spaced spindle shaft bearings you have one of the most accurate drill presses in its class. Solid cast iron construction, precision ground table, sealed ball bearings, and rubber coated quick adjust handles provide the quality and convenience you want in a machine investment. We even added a built-in light so you can see what you are doing.
